# CORK

## Cork is the modern choice, it's

- completely natural
- environmentally friendly
- a natural insulator
  - warm in winter, cool underfoot in summer
- sound absorbing
- easy to install
- comfortable to walk on
- hard wearing
- easy to clean
- available in a wide variety of colours

## Think Comfort

Cork feels soft and comfortable to walk on and yet it's durable enough to withstand even the heaviest weight and traffic.

Cork acts as a natural insulator making it warm in winter and cooler underfoot in summer. It is also sound absorbing – quiet to walk on and it reduces impact noise, such as something dropping on the floor or the sound of running children or pets.

Cork is ideally suited to the Australian climate, it has natural properties that are anti-allergenic and it's resistant to insects.

## Think Green

In an environmentally conscious world, cork offers a truly sustainable resource. Cork is an all natural product taken from the bark of the Cork Oak Tree and harvested using a traditional stripping method, so that not one tree is destroyed during the process. The bark re-grows completely within around nine years when the cork is harvested again.

## Think Easy

Cleaning and maintaining your cork floor is easy, just a regular sweep with an electrostatic mop, soft broom or vacuum is all that is required. Then when necessary just mop over your floor using QPCF Floor Cleaner with clean warm water and a well-wrung cotton mop.

## Think Quick

We offer a full supply and installation service and are proud to supply and install only the finest quality materials. Our wide variety of colours and styles mean we have something that will inspire fresh ideas in everyone.

Cork flooring is a high quality, natural material and should be seen as such. Inherent in cork is some shade variation but this is an attractive characteristic of all natural products.

Installation is easy. On average a cork floor can take several days to complete. Floor preparation is the key to ensure a quality finish. Cork can be installed on any clean, level sub floor, however a hardboard underlay is recommended if cork tiles are being laid on a strip timber sub floor.

Queensland Parquetry and Cork Floors Pty Ltd has been supplying and installing flooring products since 1978. We have a proud history of being innovative and providing an exceptional product and service to our customers. We specialise in a wide selection of floor coverings including: cork, parquetry, tongue and groove, floating floors, sanding and finishing.

Queensland Parquetry and Cork Floors Pty Ltd, incorporating Contract Floor Sanding and Comflor Commercial Floor Coverings operate throughout Queensland. For the widest possible choice in practical flooring solutions, visit our showroom or call us today.
